📍 Almaty, Kazakhstan

📱 @ildkh

SKILLS

- Python (Pandas, Numpy, Matplotlib, Scikit-learn)
- SQL
- Excel, Google Sheets
- Git
- Linux
- English (B2 - Upper Intermediate)

EDUCATION

ALMATY MANAGEMENT COLLEGE

Software developer

2021 - 2024

ABOUT ME

As a 17-year-old individual with a passion for technology and working with data, I strive to develop my skills in data analysis and data science. My interest in this field stems from my desire to help companies make informed decisions through various methods of data analysis. I am driven to start this journey at a young age and am determined to continuously grow and improve in this field.

EXPERIENCE

About a year of study experience

PROJECTS

- **Bulldozer price prediction**

Built and evaluated Regression ML model to predict the sale price of bulldozer using a "Blue Book for Bulldozers" Kaggle competition dataset

- **Heart disease classifier**

Built and evaluated Classification ML model to predict (classify) whether or not they have heart disease using Heart Disease Data Set from UCI data repository

EVENTS

Speaker at the **scientific-practical conference "Science, education, youth - the Future of Kazakhstan"**. Project on the topic "Data Mining. Decision Tree Algorithm" (1st place among 36 participants)
